RS-080 Total Water Main Shut-Off System

1-1/2" and 2" Valve Technical Specifications

Electric Actuator

- Housing made from a V0 self-extinguish class techno-polymer material.
- Direct connection of actuator to valves is made via a painted die-cast aluminum plate with a dual drilled ISO 5211 interface.
- Electronic circuit automatically adjusts the motor speed, (depending on torque variations), to keep cycle time constant.
- Electronic System and torque limiter are standard.
- Standard heater is activated once actuator is powered, and when the temperature inside the housing drops below 77° F to prevent condensation.
