

# Water Leak Detection & Alarm System

## RS-096

FloodMaster's RS-096 simple water alarm system is designed to sound an audible alarm when the sensor puck comes in contact with just 1/16" of any non-flammable conductive liquid (such as water).

The RS-096 comes with a 120 VAC transformer that is plugged into a common wall outlet. An optional dry contact output to a home security panel, control room or appropriate relay is also standard on all units.

A battery-powered leak alarm is also available (Model RS-095).

### RS-096 SPECIFICATIONS

#### Electrical:

120 VAC transformer with a common electrical plug for a wall outlet

### ORDERING INFORMATION

Valve Size	P/N	UPC
N/A	RS-096	85764000342

### BENEFITS

- Audible alarm sounds with only 1/16" of water detected at the sensor puck
- Easy installation
- Additional sensor pucks can also be added to systems where a wider area of leak detection is required
- Security systems interface with the RS-096 model

### OPTIONAL ACCESSORIES & ADD-ONS\*

- **Wired Sensor Pucks** – Up to 5 additional sensors can be wired to a single RS-096 Receiver box for a wider area of leak detection. *P/N RSA-100-XXX – see website for options*
- **Sensing Rope Kit** – The Sensing Rope is ideal for use with low tanks, or for room perimeter and sub-floor leak detection applications. *P/N RSA-175-810*
- **Auto Dialer** – A convenient, low-cost add-on to send and receive automatic alerts whenever your FloodMaster system identifies a fault condition. *P/N RSA-600-003*

### Typical Installations

- Leaky drains
- Frozen pipes
- Dishwashers
- Washing machines
- Hot water heaters
- Sump pumps
- Tubs
- Table-top containers and beakers
- Sinks
- Above/near data processing rooms

MA Board of Registration of Plumbers Approval from 05/06/2015 – 05/06/2018 Code # P1-0515-489.
