

SENSORSAYS™ 24/7 SUMP PUMP MONITORING & CELLULAR NOTIFICATION SYSTEM (SM4838)

SensorSays kit SM4838 sends an automatic, real-time alert to up to three cell phone numbers when a sump reaches a high water level – notifying you before a potential disaster and providing invaluable peace of mind.

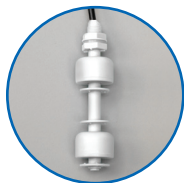

- Works with **ANY** sump pump model and brand – great for new installations and for easily retrofitting existing pumps.
- Provides your customers peace of mind that their sump is on and running.
- Includes onboard high/low temperature sensor to monitor the heating system, providing notification if the inside temperature drops below your set point.
- Powered by robust Verizon cellular service* – not unreliable home WiFi. Features onboard battery backup.
- Sends fully customizable text messages to up to three cell phones.
- Kit includes three sensor options: multi-level float switch, conductivity switch and single-level float switch.
- Easy to install, easy to activate and easy to use.

*Additional \$49.00 annual cellular contract required for online activation via the SensorSays.com web portal.

SensorSays Kit SM4838 includes:

SensorSays Sump Pump Monitoring & Cellular Notification Kit	SM4838	857640005748

How SensorSays™ Works

1. Water level rises in the pit.
2. SensorSays™ detects the rising level, sounds an alarm and immediately sends a text message to up to three cell phones.
3. Text notification of trouble is received in real time – every time!
