

**Prevent catastrophic water damage.**

**The RSC-900 Leak Detection & Optional Automatic Shut-Off System**

**State-of-the-Art Wireless Technology with App-Based Notification & Management**

**DESIGNED TO PROTECT:**

- Office Buildings
- Apartment Buildings
- Homes/Condos
- Hotels
- Nursing Homes
- Medical Centers

## Some Frequently Asked Questions:

### **How many sensors can be added to each RSC-900 system?**

Up to 29 wireless devices (any combination of sensors, actuators or repeaters) can be added to each hub. Multiple systems can be set up and managed with a single app to cover large buildings.

A location and photo for each device can be stored in the app during set up, making it easy to locate any faults.

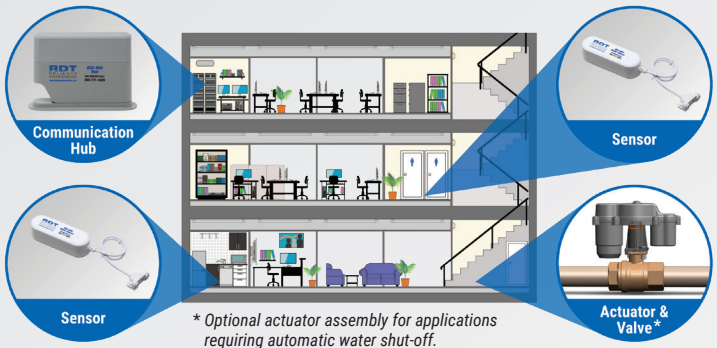

### **What is the wireless signal range?**

200' between any wireless device (sensor, actuator or repeater) and the hub. Extend the range an additional 200' with a wireless signal repeater.

### **Can I control more than one actuator and valve assembly per system?**

Yes! The RSC-900 is ideal for installations requiring control of both hot and cold water feed lines. The actuator is also IP68 rated for exterior use.

## RSC-900 Wireless Set Up and Communication

### **Will my system stop working if the Internet goes out?**

No, system monitoring and response are not dependent on Internet service, though app notifications will be stored until service is restored.

### **Are there any fees associated with the app?**

No. The app is a free download, and there are no monthly fees. Standard data rates may apply.
